I. Article title:
 "Fighting for Religious Freedom: Lessons from the Story of the Young Cave Dwellers in the Qur'an as a Religious Minority"
 While the initial topic "Fighting for Religious Freedom" emphasizes conflict and struggle, reframing it to focus on "resilience, perseverance, and upholding faith" can offer a more nuanced and positive perspective.

I am offering this perspective based on the content of the paper, particularly as captured in its analysis of the story in the main verses concerning the objective of the paper.

In view of this, I humbly suggest something like "Resilience in Upholding Faith and Religious Freedom: An Analysis of Quranic story on the Experiences of The Young Cave Dwellers as Religious Minorities"
 The suggested title (which may still be reframed better) appears to shift the focus from external conflict to the internal strength and conviction of the young believers.

It highlights their journey of navigating life as a religious minority while remaining true to their religious conviction and values.

Pre-Review Discussion

Following from the above humble observation and suggestion, it will be good if the author could use more subtle words to replace "fight" in the manuscript.
