SCImago Team

Dear Shireen,

Thank you very much for your comment.

All the metadata have been provided by Scopus /Elsevier in their last update sent to

SCImago, including the Coverage's period data. The SJR for 2019 was updated on June 2020, 11th. We suggest you consult the Scopus database directly to see the current index status as SJR is a static image of Scopus, which is changing every day.

Dear Sir/Madam,

I would like to query why some journals which are listed as still "active" in the beginning of this year's Scopus indexed list, some of them are informed in your site as having "Coverage" until 2019 whereas others until 2020? What does such "Coverage" actually mean?

Thank you very much for your enlightenment.

reply

**Melanie Ortiz** 1 week ago

SCImago Team

Dear Moyap, thank you very much for your participation.

Our data come from Scopus/Elsevier, which offers an annual copy of their database. We understand that, since the date indicated by Scopus/Elsevier (2019), the journal is no longer indexed in its database. However, we always suggest our users to consult the Scopus database directly as SJR is a static image of Scopus, which is changing every day.

Dear Author, I ratde from Q2 down to Q4, My writing has just been published in Iratde on a Q2 fee. Are there any cost changes?

reply

**S** **Shakeel** 1 week ago

Hi Team SCImago,

Can I know if I published a paper before 11th June, will it be considered as Q2(rank before 11th June) or Q4(rank after 11th June)?

Thanks

**Melanie Ortiz** 17 hours ago

SCImago Team

Dear Shakeel,

Thank you for contacting us.

You can show that this journal was Q2 (Education) and Q3 (Developmental and Educ. Psycho.) in 2018 by citing SJCR's website, as this was the latest value before

the publication of SJR for 2019 in June 2020, 11th.

Thanks information Mr. Saediman

**eka wahyudi** 1 week ago

why did this journal go down to Q4? I submitted it earlier this month,

reply

**Melanie Ortiz** 1 week ago

SCImago Team

Dear Eka,

Thank you for contacting us.

For every journal, the annual value of the SJR is integrated into the distribution of SJR values of all the thematic categories to which the journal belongs. There are more than 300 thematic categories. The position of each journal is different in any category and depends on the performance of the category, in general, and the journal, in particular .

The SJR indicator is a very sophisticated indicator that is much more complex to calculate and understand than the Impact Factor. Several variables must be taken into account to calculate the SJR. There are two important variables that we cannot leave out.

- The number of citations is one of those variables but not the only one because it is weighted by the citations received and where the journal is cited in.

It is different if the citations come from highly-cited Journals or not. Imagine that these 5 quotes appear in the most cited Journals. That part of the calculation is no longer worth 5, it is worth much more. This variable is called "authority principle".

-The second variable is the thematic category's distribution. If most of the journals categorized in X thematic category are cited by lowly-cited journals, the quartile of a journal cited in highly-cited journals will be better than the other ones.

Best regards,  
SCImago Team.
